PARK USER STATISTICS 1982

INTRODUCTION

Alberta Recreation and Parks is pleased to forward for your use its Sixth Annual User Statistics Report. This report presents the information collected in the field by Operations staff in a format considered to be easily comprehensible and useful. With the changes in User Statistics 1982, this presentation has again moved closer to meeting the needs of the report users. New inclusions to this year's report are the graphs of camping attendance for those Kananaskis Recreation Areas that provided camping statistics. As well, a summary page for each region has been included explaining happenings in the parks which may have affected attendance statistics. Regional summary charts and graphs have been developed and included with each region section, and a provincial summary table and graph can be found in Appendix I, presenting total camping attendance across the Alberta Provincial Park System.

Camping use statistics are generally quite accurate and reliable but the accuracy and reliability of day use figures are very suspect due to a number of factors involved in their collection and they must be used with caution. New programs aimed at correcting these problems will be investigated in the coming years. Since camping self-registration programs have been initiated in certain parks, a number of problems have surfaced dealing with inadequate information collection. In 1983 these problems will be eliminated by the use of a new self-registration permit and through increased familiarity of park staff in dealing with problems that arise.

The co-ordination, design, and preparation of this report has been carried out by Robyn Andries and Dale Schinkel of the System and Program Development Section, Planning Branch, Alberta Recreation and Parks. Data collection was carried out by the field staff in the 61 Provincial Parks. The Section gratefully acknowledges the assistance of Keith Wong, Systems Analyst, for his work implementing the computer program. As well, the Section thanks Rod Keith for the micro-computer programs developed and Jan Gelfund for his work organizing and compiling data. Any comments concerning the collection, analysis, and presentation format of the statistics are welcomed by the System and Program Development Section.

FORMAT

The format for individual Provincial Park statistics concerning camping and day use during the summer season remains the same as that of last year. The handbook is alphabetically organized by region and, within each region, alphabetically by parks, with camping and day use parks followed by day use only parks. Multiple campground parks are presented with the statistics and the graph for the total park shown first, followed by separate statistics and graphs for each camping and/or day use area within the park. Data for individual Recreational Areas in Kananaskis Country are shown in tabular and graph form as well this year. Interpretive statistics are indicated on data format sheets at the end of each region. Definitions can be found in the Glossary of Interpretive Terms. Changes in the format of this year's handbook include the following: Regional summaries have been included with the summary of Park User Statistics for 1975-1982. In addition, Appendix VII entitled "Adjustments Made to Account for Errors in Self Registration Camper Night Figures", has been included to explain in detail the corrections made for specific parks where problems in individual camper night, camping vehicle and equipment breakdown figures occurred. Regional and Provincial summary tables and graphs have been developed to give comprehensive totals "at a glance". The Regional tables and graphs precede the statistics for individual parks in the appropriate region and the Provincial summary is located in Appendix I.

When using Alberta Provincial Parks User Statistics 1982, some points should be noted. These include:

1. A rounding factor has been designed into the computer program and therefore %'s may not be equal to 100% when added;
2. If the data for any month are not available, the month will not be shown and seasonal totals will be underestimated;
3. Data may have been incomplete on the Monthly Park Attendance Report and therefore totals may be underestimated; and
4. Day use statistics continue to reflect large inaccuracies in data collection procedures and must be considered as estimates at best.

GLOSSARY OF TERMS

Campground Capacity: Number of camping sites available for use during the 1982 summer season, as indicated on the Provincial Parks Facility Inventory Chart.

Individual Camper Night (Camper Day): The passing of one night, in the park, by one camper.

Camping Party: A single person or group of persons, usually travelling in the same vehicle, occupying one campsite.

Camping Party Night: One campsite occupied by one camping party for one overnight stay.

Peak Night(s): Night(s) of highest campground occupancy during the summer season.

Day User Day: One person making a recreational visit to a park for one day or portion of one day without staying overnight.

Camping Equipment:

- Tent - A movable shelter of cloth, usually canvas, or nylon, supported by pole(s) and guy ropes.
- Tent-Trailer - A canvas or other folding structure, mounted on wheels, and designed for travel, recreation and vacation use.
- Trailer - A vehicular, portable structure, built on a chassis, designed as a temporary dwelling, to be pulled behind a motor vehicle for travel, recreation and vacation.
- Truck-camper - A truck which has a shelter structure or after-cabin attached or separately mounted on its box deck or chassis, to form a single unit for purposes of travel, recreation and vacation. The after-cabin usually contains sleeping and cooking facilities and may or may not contain sanitary facilities (includes vans, motor homes, etc.).

Non-Recreation Vehicles: Vehicles entering the park for purposes other than recreation, including service, commercial, construction and park vehicles.

Weekend Night: A normal weekend includes both Friday and Saturday nights. A long weekend includes Friday night, Saturday night and Sunday night.

Weekday Night: Includes Sunday night to Thursday night. However, when a long weekend occurs, Sunday night is included as part of the long weekend.

GLOSSARY OF SYMBOLS

X - Statistics Not Available

TTR - Tent-Trailer

TRLR - Trailer

TKCP - Truck-Camper

HOW USER STATISTICS ARE CALCULATED

Campground Capacity = Taken from the 1982 Alberta Provincial Parks Facility Inventory Chart

Vehicles, Total = Total number of vehicles entering the park (from Park Monthly Attendance Reports)

Vehicles, Non-Recreation = Total number of vehicles entering the park on weekdays and weekends for purposes other than recreation, including service vehicles, park patrol and R.C.M.P. (based on estimates calculated from sample counts of vehicles entering the park).

Vehicles, Camping = Total number of vehicles entering the park on weekdays and weekends for the purpose of camping overnight (based on number of camping permits sold each day).

Vehicles, Day Use = Total number of vehicles entering the park on weekdays and weekends for day use only is based on the (Total number of vehicles entering the park) - (Number of Non-Recreation vehicles + Number of Camping vehicles).

Number of Day User Days = Total number of people using the park during the day only (based on sample counts of estimated number of Day Users per vehicle x number of Day Use vehicles).

Average Day Use Party Size = $\frac{\text{Number of Day User Days}}{\text{Number of Day Use Vehicles}}$

Number of Camping Party Nights = Number of Tents + Tent-Trailers + Trailers + Truck-Campers

Percent Capacity = $\frac{\text{Number of camping parties in park on a given night}}{\text{Campground capacity}} \times 100$

Average Daily Occupancy, Weekdays = $\frac{\text{Total camping parties on weekdays}}{\text{Campground capacity x number of weekday nights}} \times 100$

Average Daily Occupancy, Weekends = $\frac{\text{Total camping parties on weekends}}{\text{Campground capacity x number of weekend nights}} \times 100$

Number of Individual Camper Nights (Camper days) = Total number of individual people camping in tne park (from monthly Park Attendance Reports)

Average Camping Party Size = $\frac{\text{Number of Individual Camper Nights}}{\text{Number of Camping Party Nights}}$

Camping Equipment Used:

% Tents = $\frac{\text{Number of Tents}}{\text{Number of Camping Party Nights}} \times 100$

% Tent-Trailers = $\frac{\text{Number of Tent-Trailers}}{\text{Number of Camping Party Nights}} \times 100$

% Trailers = $\frac{\text{Number of Trailers}}{\text{Number of Camping Party Nights}} \times 100$

% Truck-Campers = $\frac{\text{Number of Truck-Campers}}{\text{Number of Camping Party Nights}} \times 100$

Average % Camping Occupancy
(Summer season: May 15-September 15) = $\frac{\text{Total Camping Party Nights for the Summer Season}}{\text{Campground Capacity x Total Number of Nights}} \times 100$

GLOSSARY OF INTERPRETATIVE TERMS

Amphitheatre:	Formal presentation, which usually involves the use of audio-visual materials, conducted by park naturalist in an amphitheatre structure.
Auto Tour:	Conducted tour by automobile or bus, in which park naturalist conveys information to visitors as a group.
Campfire/On-Site Presentation:	Small, informal evening program, which may involve interpretive talks, skits, musical events, etc., conducted by park naturalist near campground area
Children's Event:	Special programs designed specifically for children under the age of twelve.
Environmental Education:	Contact with organized groups participating in approved environmental education activities in a designated centre.
Environmental Education Workshop:	Organized program which demonstrates field procedures, activities, or park policies to teachers.
Extension Program:	Park personnel contact with the public outside of the park setting in which information about park and/or activities is presented.
Guided Hike:	A regularly scheduled walk conducted by a park naturalist over an established route or area.
Guided Schools:	Contact made by way of interpretive information being provided to organized school groups in the park setting.
Mass Media:	Message communicated by way of TV, radio or newspaper.

On-Site Exhibit:	Display or exhibit on the actual site presenting information on a natural, cultural or historic topic.
Preserve Hike:	Similar to guided hike except that the route of this walk takes the visitor through special preserve areas accessible to the public only under supervision of park personnel.
Publications:	Pamphlets, brochures, maps or notices distributed by park staff to convey interpretive or general park information.
Roving Point Duty:	Casual contacts made by park naturalist when walking through campground area and answering visitors' questions.
Self-Guided Trail:	Well-marked hiking trail where visitors follow a series of signs which present some unified aspect of the natural surroundings.
Special Event:	A non-regularily scheduled program or activity presented by a park naturalist usually involving a temporary natural occurence (i.e. summer equinox, fall colours or tadpole hatching).
Visitor Centre:	A building or group of buildings where information, orientation, and/or interpretation is provided for visitors.
Wayside Sign:	Sign/display panel situated within easy access of vehicles travelling along a roadway.

EAST CENTRAL REGION
(All Parks in the Region experienced a wet and rainy late summer)

Big Knife	- Attendance for day use and camping down from 1981. Partial closure of campground early summer for upgrading until July. Construction forced closure of all campgrounds and most day use areas for August and September.
Calling Lake	- Day use figures down from 1981, camping figures about the same.
Cold Lake	- 110 campsites open in 1982 as compared to 27 in 1981, attendance figures relatively low.
Dillberry Lake	- Attendance figures much the same as 1981.
Garner Lake	- Attendance figures slightly down.
Gooseberry Lake	- Attendance figures slightly down from 1981, June 19, 20 - annual Legion Rodeo.
Gregoire Lake	- Big drop in day use figures, camping figures slightly up from 1981. Rainy towards end of summer.
Little Fish Lake	- Data available for 3 months only. Day use up from 1981 and camping figures about the same.
Long Lake	- Day use and camping figures down slightly from 1981 (May & June day use counted on weekends only).
Miquelon Lake	- Day use and camping figures down slightly.
Moose Lake	- Day use down a lot, camping down slightly. Park on self-registration procedure - high use August long weekend.
Rochon Sands	- Camping use slightly down - day use figures were not kept at all except for weekends during May and June. Tent caterpillars during June.
Sir Winston Churchill	- Day use and camping figures slightly down - lots of school and church groups through early summer. Algae in water, fishing very poor middle to late summer.
Vermilion	- Day use up slightly, camping use down slightly. Lots of group use throughout whole summer.
Whitney Lakes	- New park opened in 1982, received very good use throughout summer especially first part of June. Day use and camping figures much the same.
Strathcona Science Park	- Attendance figures seem low for a park located in Edmonton.

KANANASKIS REGION

Bow Valley	- Traffic counter problems all summer, estimated attendance during September (no one working in booth). Day use down drastically, camping up slightly.
Bragg Creek	- Day use and camping figures up slightly from 1981.
Gooseberry	- Limited access to area due to road construction on Highway 66. Self-Registration area, camping and day use figures up slightly.
McLean Creek	- Limited access to area due to road construction on Highway 66. Closure of 2 camping loops (out of 4) from mid-July to end of season. Day use and camping figures up substantially.
Station Flats	- Closed for redevelopment 1982 and will be converted to day use area in 1983.
Paddy's Flat	- Limited access to area due to road construction Highway 66 - 2 loops out of 5 closed for entire summer. Attendance up slightly, self-registration area.
Beaver Flats	- Limited access to area due to road construction on Highway 66. Area closed completely at end of July Self-Registration area. Camping figures down slightly.
Eau Claire	- Day use area closed most of summer season. Camping figures down slightly, self-registration area.
Lac Des Arcs	- Self-registration area. Camping figures down.
Bow River	- Self-registration area. Camping figures down substantially.
Three Sisters	- Self-registration area. Attendance figures down substantially.
Evans-Thomas	- Closed for redevelopment all 1982 season.
Paddy's Flat Day Use	- Closed permanently.
Elbow Bridge Day Use	- Name changed to Allen Bill Pond - closed for redevelopment.
Ice Caves Day Use	- Day use attendance up slightly even though area closed August and September with limited access entire season.
Elbow Falls Day Use	- Limited access due to road construction - closed August and September.
Kananaskis	- Incomplete attendance statistics kept for Canyon Campground. Fully open this year (no equipment breakdown provided). Boulton Campground opened late June and was partially closed during August for paving. Elkwood opened all season, camping and day use figures up slightly.

NORTHERN REGION

(1982 was a very rainy season for most parks in the Peace Region and therefore lower attendance statistics were recorded in most parks.)

Carson-Pegasus	- A new park opened for the 1982 season. Very high camping attendance - capacity is actually 144 but the campground was not fully open until end of summer.
Cross Lake	- Self-registration park. No equipment breakdown provided therefore camping party night statistics and percent capacity information unavailable. Camping figures down substantially.
Hilliard's Bay	- Number of sites increased from 22 to 184. Day use about the same, camping figures substantially lower.
Lesser Slave Lake	- Previous capacity for park was 130 units based on Marten River Campground (105) plus 25 units in Lily Creek Group Camp. Capacities of group use areas in other parks are not counted, therefore the capacity has been readjusted to reflect only Marten River campground. Day use figures are substantially lower - camping figures about the same.
Moonshine Lake	- Self-registration instituted in 1982. Lower attendance may be due to the rainy season, new registration system, or because the beach and lake area were closed for most of the summer.
Notikewin	- Incomplete statistics kept in May and August. Park closed for a time in July due to possibility of river flooding.
O'Brien	- Park flooded in middle of July, closed for remainder of season.
Queen Elizabeth	- Adopted self-registration system in 1982. Incomplete campground statistics available (see Cross Lake). Caterpillars during June. Big rodeo weekend in early part of August. Attendance statistics down slightly.
Saskatoon Island	- Attendance figures down slightly.
Williamson	- Day use figures down a lot, camping up slightly. Lots of school group use during June.
Winagami	- Camping use up slightly, day use statistics down. Self-registration park.
Young's Point	- Camping use about the same, day use attendance down.

SOUTHERN REGION

Beauvais Lake	- Self-registration park. Camping and day use statistics up substantially.
Chain Lakes	- Day use and camping attendance up. Park on self-registration.
Cypress Hills	- Day use and camping attendance down. Incomplete statistics collected in April for all campgrounds. Reesor and Firerock campground closed for early part of June. Firerock closed September for construction.
Dinosaur	- Attendance (camping and day use) figures up.
Kinbrook Island	- Park expanded from 132 sites to 223 sites. Day use figures increased dramatically over 1982 (may be due to traffic counter difficulties) Camping use down slightly.
Little Bow	- Attendance (camping and day use) figures up slightly.
Park Lake	- Day use and camping figures down from 1982.
Police Outpost	- Attendance figures up slightly.
Taber	- No September statistics available. Day use figures down dramatically, camping figures about the same.
Tillebrook	- Day use figures up substantially. Traffic counter problems during summer. Camping figures up slightly.
Willow Creek	- Day use down slightly, camping use up slightly.
Woolford	- Day use figures much higher, camping figures about the same. Lots of school and church group use through summer.
Writing-On-Stone	- Good group use through summer. Day use down, camping attendance about the same.
Wyndham-Carseland	- Camping and day use attendance up from 1982. Self-registration Park.

WEST CENTRAL REGION
(Most parks experienced very wet and rainy late summer seasons)

Aspen Beach	- Incomplete camping statistics for botn campgrounds in April and September. Camping and day use down from 1982. Park capacity changed from 842 sites to 792 sites to reflect capacity restriction of 350 parties in Brewer's Campground.
Big Hill Springs	- June statistics were estimated - attendance down slightly.
Crimson Lake	- Day use statistics up dramatically, camping figures up moderately.
Fish Creek	- Better accounting for statistics this year. Day use figures almost double those of 1982.
Hasse Lake	- Attendance up slightly.
Jarvis Bay	- Partial closure of campground during May and early June. No attendance report received for September. Camping figures up slightly.
Ma-Me-O Beach	- Attendance down moderately. Incomplete statistics for April and September.
Pembina River	- Lots of group use May and June. Attendance figures down slightly.
Pigeon Lake	- Attendance figures down slightly. Incomplete statistics for April and September. Traffic counter problems throughout summer.
Red Lodge	- Attendance figures down moderately.
Thunder Lake	- Attendance figures up slightly. Lake was contaminated and closed for swimming during part of July. Very rainy in the late summer.
Wabamun Lake	- Day use and camping down moderately.
William A. Switzer	- Self-registration park. Attendance figures down slightly.

+ These figures are for Kananaskis Provincial Park and do not include figures for Kananaskis Recreation Areas.

* This is the completed capacity for this park - most of the summer this park operated with only 100 sites open. This has been noted as it's capacity on regional tables.

"Total Units", "Number of Nights at Greater Than 90% Occupancy" and "Average % Occupancy" may have two or more Ranking Numbers of equal value.

ADJUSTMENTS MADE TO ACCOUNT FOR ERRORS IN SELF-REGISTRATION CAMPER NIGHTS

The most accurate method of calculating camper nights is to simply take the number of people in each camping party in a park overnight and sum them. In parks where there is a manned attendance booth, this would be normal practice as the number of people in each party is written on the permit when campers register.

At present, parks are beginning to move away from this time-intensive and relatively expensive practice of having park personnel on duty to write permits and collect money, and moving toward a method of camper self-registration. This self-registration procedure places the responsibility on the camper to register at an unmanned booth and deposit the proper amount of money for as many nights as the party plans to stay. Park personnel are used in a more supervisory role where they simply empty the registration containers and remind those campers who have not yet registered to pay. A pitfall in this method is the lack of any information on the self-registration permit that pertains to how many people are in the camping party. This lack of information leads to the necessity of calculating camper nights based on some other method that is still reasonably accurate. In these cases, the equipment breakdown (that is, the number of tents, tent-trailers, truck-campers, and trailers) which represent camping parties is used - the numbers are summed and are multiplied by a predetermined figure which represents the average party size across the entire provincial park system. The multiplier used was 3.4 and was based on a figure obtained by summing the total number of camping party nights and dividing by the total number of camping parties for 1980. Two self-registration parks used slightly different multipliers to calculate camper nights; these were Moose Lake (which used 4) and William A. Switzer (which used 3).

Cross Lake and Queen Elizabeth parks neglected to include equipment breakdowns and in these cases the multiplier 3.4 was used with the total camping vehicles to obtain a rough estimate of camper nights.

The self-registration parks that had camper nights calculated by either of these methods are listed below:

Bragg Creek Provincial Park
Chain Lakes Provincial Park
Cross Lake Provincial Park
Kananaskis Recreation Areas:
- Gooseberry Recreation Area
- Paddy's Flat Recreation Area
- Beaver Flat Recreation Area
- Eau Claire Recreation Area
- Lac Des Arc Recreation Area
- Bow River Recreation Area
- Three Sisters Recreation Area

Moonshine Lake Provincial Park
Moose Lake Provincial Park
Queen Elizabeth Provincial Park
Saskatoon Island Provincial Park
Whitney Lakes Provincial Park
William A. Switzer Provincial Park
Winagami Provincial Park
Wyndham-Carseland Provincial Park

Aspen Beach Provincial Park, Dinosaur Provincial Park, Carson-Pegasus Provincial Park, and Red Lodge Provincial Park also used multipliers to calculate camper nights even though these parks were not on self-registration. These parks used multipliers which they determined were more accurate for their park. Red Lodge and Aspen Beach used 3.4; and Dinosaur and Carson-Pegasus used 3 as multipliers.

It was estimated that all parks on self-registration had a high (98-100%) compliance rate after one reminder to pay and no further adjustments in figures were necessary.
